

FDA approved – for applications in the food industry

Optibelt extends product range

After the successful market launch of the Optibelt ALPHA linear timing belt for the direct conveyance of food, Optibelt extends the product range with additional products.

• **ALPHA linear timing belt**

The current range is now available either with aramid or steel tension cord in the basic colour blue. On request, the product is also available in transparent. Optionally, individual sections are offered with or without coiling sleeve. Depending on the chosen tension cord the section variety ranges from T5 up to 8M.

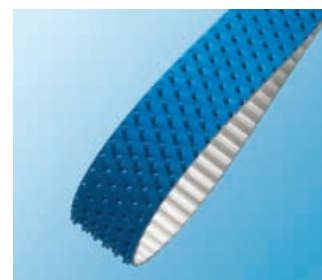

ALPHA linear

• **ALPHA special timing belt**

In addition to the blue, FDA approved ALPHA linear timing belts Optibelt offers a broad range of coatings which can be applied to standard belts subsequently. All coatings are FDA approved and available in different materials, hardness degrees and colours (white or blue).

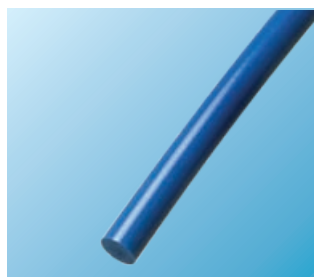

FDA approved

ALPHA special

• **Round section belt RR**

Starting from now, another product for applications in the food industry is available: the Optibelt round section belt RR, coloured blue, FDA approved. The diameter of the round section belts ranges from 2 mm to 15 mm. On request, the belts can additionally be equipped with a tension cord.
