

Distributor fair in "Swedish"

**Walter Freyling presents innovations by Optibelt**

On the occasion of a typical Swedish customer event with our partner TOOLS Momentum in Örebro, Walter Freyling, in charge of the sales in Sweden, presented innovations by Optibelt.

In the spotlight of the event were drive optimisation solutions with the worldwide unique maintenance-free Optibelt RED POWER II high performance wedge belts and kraftbands. Furthermore various technical devices for energy saving and drive optimisation were presented and demonstrated for the interested customers.

Altogether it has been a small but nice event which was completed by a speedway race on the racetrack in Kumla in the late afternoon.
