

optibelt *MARATHON 1*

The MARATHON 1 has an excellent tension behaviour with low stretch. That, together with the section accuracy, means it is quiet running to a high degree when it comes to rotating alternators, water pumps or air conditioning compressors.

The continuous utilization of the MARATHON 1 is of special economic efficiency due to the high maintenance-free performance.

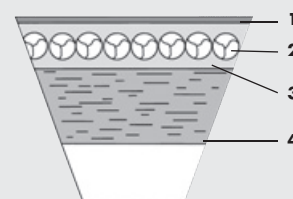

Advantages

- Long life
- High efficiency
- Maintenance-free operation
- Quiet running
- Excellent tension behaviour

The Optibelt MARATHON 1 is a special development for driving ancillaries on passenger car and commercial vehicle engines.

MARATHON 1

- 1 Fabric
- 2 Low stretch polyester cord
- 3 Adhesive chloroprene rubber cushion compound
- 4 Polychloroprene rubber compound with transversely oriented fibres

Sections:

AVX 10; AVX 13

Special sections:

AVX 11; AVX 11,2; AVX 11,5;
AVX 11,9

Sizes:

AVX 10 from 600 to 1625 mm
 AVX 13 from 700 to 2500 mm
 AVX 11 528 mm
 AVX 11,2 from 785 to 866 mm
 AVX 11,5 from 685 to 790 mm
 further sizes on request

Examples of Applications

- | | |
|-----------------------------|--|
| Raw edge,
moulded cogged | ■ high power transmission,
small pulley diameters |
| Fibre core | ■ high wear resistance,
quiet running, slip-insensitive |
| Polyester tension cord | ■ excellent tension behaviour,
low stretch,
maintenance-free |
