

DISTRIBUTION & FULFILLMENT CENTERS
CONVEYOR POWER VB

CONVEYOR POWER VB

To meet the needs of growing distribution and logistics facilities, Optibelt has created the Conveyor Power line of products. Conveyor Power v-belts are engineered to power rollers in linear and curved applications. These belts are engineered for superior performance that lasts far longer than off-the-shelf power transmission belts.

Features:

- High-flex cords reduce heat and flex fatigue.
- Rubber compound flexes for curved conveyor applications.
- Durable low dust cover keeps facilities cleaner
- Operational temperature range -22°F to $+158^{\circ}\text{F}$.

Length Range:
B69 to B675

SUCCESS STORY: LIVE ROLLER CONVEYORS

A leading North American supplier of intelligent material handling and automated solutions had issues with their v-belt driven live roller conveyors. Conveyor Power VB addressed the issues of excessive belt dust and more than doubled belt life! Optibelt is currently working with the supplier to find additional solutions and cost savings.
