

SUCCESS STORY

RED POWER

INDUSTRY

Cement

APPLICATION

Concrete Vibrators

COMPANY PROFILE

Block Manufacturing Plant

PROBLEM

3V and 5V belts were experiencing loss of tension due to the large tolerances on multiple belt drives, causing them to prematurely fail.

SOLUTION

Optibelt RED POWER Banded and Single V-Belts

RESULTS

RED POWER v-belts have shown improvements in:

- 8X more durability (on average) in the harsh environment where debris and other foreign substances are present.
- Increased belt life by 40%.
- Reduced maintenance due to the unique maintenance free feature and increased performance being up to 97% efficient because our length tolerances, S=C plus, is the tightest in the industry which reduces the need for matched sets.
