

SUCCESS STORY

RED POWER

DRIVE SPECIFICATIONS

- Red Power V-Belt Drive;
5-5V950

INDUSTRY

Pulp and Paper

APPLICATION

Chipping Saw

COMPANY PROFILE

Large Pulp and Paper Facility

PROBLEM

A customer was noticing a large amount of belt spend for one machine in their plant and was looking for solutions that could withstand the harsh environment of this drive.

SOLUTION

Optibelt RED POWER V-Belt; 5-5V950

RESULTS

Optibelt's RED POWER v-belts lasted longer than the competition and within a year's time the facility was able to decrease the amount of belts purchased by two-thirds. The features listed below prove why it's the belt of choice for this drive now:

- Maintenance-free properties require no re-tensioning throughout the lifetime
- Transverse fiber rubber material offered an additional 50% capacity over a conventional v-belt allowing it to handle the intense loads.
