

# SUCCESS STORY

## RED POWER

### DRIVE SPECIFICATIONS

- Red Power V-Belt Drive

### INDUSTRY

Pulp and Paper

### APPLICATION

Planer

### COMPANY PROFILE

Large Pulp and Paper Facility

### PROBLEM

An end user was seeing failures weekly due to the belts becoming overloaded and the constant maintenance and downtime to re-tension the belts was a substantial cost.

### SOLUTION

Optibelt RED POWER V-Belts

### RESULTS

Optibelt's RED POWER v-belts ran for many more months longer than the competition and the features listed proved it to be the belt of choice for this drive:

- Maintenance-free properties require no re-tensioning throughout the lifetime
- Transverse fiber rubber material offered an additional 50% capacity over a conventional v-belt allowing it to handle the intense loads.
